

Whitepaper

The Turan Network application has been designed for people to get used to digital currency and mobile mining.

Unlike its competitors, it will not hide its total supply and will keep its roadmap up-to-date, and will be a pioneer in the market for years.

It will be made available in the TURAN BEP20 network, which has a certain amount of supply. Remember, 2024 will be the year of TURAN NETWORK.

Taking care to keep the TURAN roadmap up to date, it will take its place in many major exchanges when it is published, and most importantly, TURAN NETWORK miners will distribute their mining earnings on the last day of each month as of September 30.
